EDUCATION

American International University-Bangladesh

Bachelor of Science in Computer Science and Engineering (Current CGPA: 3.60 / 4.0)

Dhaka, Bangladesh

January 2022 – Present

PROJECTS

PI-Mart, An Ecommerce System with Payment Gateway

Apr 2025 – Sep 2025

MongoDB, Express, React, Node.js, Redux, Tailwind CSS, JavaScript, Stripe

[GitHub Link](#) | [Live Link](#)

- Accelerated **JWT** token validation with token refresh mechanisms and **Bcrypt** password verification to **<50ms** per request through optimized middleware pipeline.
- Optimized queries and API **response time to <150ms**, reducing server load by about **35% across 10+ collections**.
- Engineered Stripe **webhook** processing with raw body parsing and event validation, reducing order synchronization latency by **40% from 300ms to <180ms** enabling inventory updates.

AI-Bot, An Embedded SaaS 24/7 Human Assistant AI Chatbot.

Dec 2025 – Mar 2026

Next.js, Tailwind CSS, TypeScript, OpenAI, Neon

[GitHub Link](#) | [Live Link](#)

- Built a **real-time embedded platform** with an integrated **AI assistant** for text generation and recommendations.
- Established **microservice-based architecture** and **Scalekit**, achieving a **99.99% authentication success rate** and handling **5000+ requests per minute**, asynchronous messaging, and AI agent services, ensuring high availability.
- Implemented **Socket.io** for live chat synchronization across multiple users and AI responses with **<100ms latency**.

PI-Rides, A Ride-Sharing Platform with Map Tracking

Aug 2025 – Feb 2026

MongoDB, Express, React, Node.js, Context API, Tailwind CSS, JavaScript, Socket.io

[GitHub Link](#) | [Live Link](#)

- Spearheaded the development of a **scalable ride-sharing system** for ride matching and user management, leading to a **7% improvement** in overall ride completion rate.
- Enhanced driver allocation during available hours, reducing **waiting times by 20%**.
- Improved overall system efficiency by **refactoring services**, achieving a **30% increase in performance**.

EXPERIENCE (PROJECT BASED)

WiFi & Internet Bill Management System

May 2023 – Sep 2023

Java, Swing Toolkit, JDBC, MySQL

[GitHub Link](#)

- Constructed a comprehensive billing system using **Java Swing and JDBC**, automating subscription tracking.
- Reduced manual calculation effort by about **70%** and improved billing accuracy through **mathematical** logic.
- Streamlined system **performance** by refining **SQL** queries and connection handling, achieving approximately **30%** faster data processing and ensuring smooth operation under concurrent usage scenarios.

PROGRAMMING ACHIEVEMENTS & RESEARCH

Programming Achievements (600+ Problems Solved on Various Platforms):

- Leetcode:** 1300+ Rating | **100+** Solved.
- Codeforces:** | **250+** Solved.
- CodeChef:** **Global Rank 1st** (DSA Challenge 06) | **100+** Solved.
- Code360:** | **100+** Solved.
- GeeksForGeeks** | **50+** Solved.

Research Title: Zone-Based Risk Prediction and Risk-Aware Intelligent Routing for Smart Navigation Using Machine Learning.

Oct 2025 – Present

- Developed a zone-based machine learning framework that predicts urban risk with over 99% accuracy ($R^2 = 0.999$) and integrates it into a risk-aware intelligent routing system.

TECHNICAL SKILLS

Languages: C++, Java, C#, JavaScript, TypeScript, SQL, PL/SQL.

Frameworks, ORM and Databases: Node.js, Express.js, Nest.js, React.js, Next.js, .NET Framework, ASP .NET MVC & ASP .NET Core Web API, TypeORM, MySQL, MSSQL Server, PostgreSQL, MongoDB, Oracle.

Soft Skills: System Design (LLD), OOPs, Git/GitHub(**300+ contributions**), Docker, Postman, Team Collaboration.
